About Me

Computer Science Engineering graduate with knowledge of UI/UX design and a passion for creating simple, user-friendly, and visually appealing digital experiences. Skilled in wireframing, prototyping, user flows, and responsive interface design using Figma. Familiar with user-centered design principles and designing mobile and web application interfaces. Eager to learn, improve design skills, and contribute to creating intuitive and engaging user experiences.

PROJECTS

Novel Reading Website (UI/UX Project): Figma

- User research & design: Conducted user research to understand reader needs, designed wireframes and interactive prototypes for seamless navigation, and created a clean, readable interface with dark/light reading modes.
- UX improvements: Improved user experience through intuitive layout, bookmarks, and genre filtering.

Dish Dash –Restaurant Management System

- Restaurant Technology Solution Provider: Service Package Management, Quarterly Client Review & Renewal, Staff Training & Development.
- Operational Efficiency Enhancement: Menu & Billing System Management.

Coin Collector Game (Unity Engine): C# / Unity 6

- Game Development: Built a 2D top-down game in Unity 6 using C#.
- Game Mechanics: Implemented player movement, coin collection, score tracking, and win-condition logic.

INTERNSHIP

SYNNOVIQ TECHNOLOGIES -

- **ROLE:** 3d MODELER
- Created high-quality models for a game created by the company.
